Leadership Competencies

Each of the questions in the previous section is linked to one of the four leadership quadrants.

Self-Management refers to personal awareness, self-regulation, stress management, resilience, transparency and authenticity. It describes the process of managing one's emotions maturely to achieve the best outcomes. It may require positive self-talk and recovery periods to fuel peak performance in turbulent times and avoiding burn out. Successful self-management requires management of yourself and taking care of your brand and reputation.

Relationship Management refers to the ability to achieve better results through better relationships. It is about getting along with others in order to get ahead. It can involve the ability to build trusting, loyal relationships with stakeholders to support retention and performance. Successful relationship management requires recognition that your own level of performance relies on the performance of your team, which in turn relies on their engagement.

Working in the Business refers to having the experience, capability and efficiency to consistently deliver great results. It requires having the energy, passion and competitive drive to stay in the performance zone. Success in this area can involve smarter prioritization of work, more delegation, better time management and more effective goal setting. It is about achieving service and operational excellence in a timely, efficient manner.

Working on the Business refers to adding extra value through innovation and strategic planning, and building motivated, accountable teams. Success in this area can involve long-term planning to achieve competitive advantage and delivering results through high-performing cultures. Leading change requires spending more time on the business, having a planning cycle, conducting regular planning reviews, and challenging poor performers.
